Product description

Antibacterial Natural Calk is ideal for removing mould and lichens from walls, as well as odours in closed rooms and cleaning oily surfaces. It is ecological.

Features

Antibacterial Natural Calk is a colourless and odourless, non-toxic, non-dangerous liquid disinfectant.

Fields of use

Antibacterial Natural Calk is used in the treatment of internal and external surfaces, bricks, old paints, natural stone and wherever it is necessary to disinfect and eradicate mould.

It is used as a base coat for lime finishes and to reduce surface absorption.

The company takes on sole responsibility for the product up to the departure of the material from our deposit, while the application, use and processing are the exclusive responsibility of the customer or the applicator.

The company reserves to modify the composition keeping the characteristics naturally unchanged. We decline all responsibility for the incorrect use and application of materials other than those recommended from the Natural Calk Line.

Application rules

Antibacterial Natural Calk is applied to the surfaces to be treated with a brush or spray.

After 2 hours, brush the treated wall with a semi-rigid brush until the dried mould is removed, then rinse with water.

To avoid the formation of mould on any surface, it is advisable to treat them periodically, especially in cold periods.

As a deodorant, it removes odours, does not leave stains on walls, fabrics or other treated surfaces; being odourless, only a sensation of freshness remains. Let it dry.

Yield

With the Antibacterial Natural Calk, you can treat: as an anti-mould, with a brush with regular surfaces 8 sqm/l, as a deodorant 30 sqm/l, for lichen disinfestation 2 sqm/l. Supplied in 1-5-25 litres tank.
